Key words: syrphids, list of species, taiga zone, Magadanskaya Oblast.

Ключевые слова: сирфиды, список видов, тайга, Магаданская область.

Abstract. 198 hoverfly species belonging to 45 genera of three subfamilies were collected from Magadanskaya Oblast. Representatives of the subfamily Microdontinae have not been found in the study area as well as in many other northern regions. Most species were recorded in the subfamily Syrphinae (104 species), followed by Eristalinae (88 species) with a difference of 14 taxa, and the subfamily Pipizinae with 6 species closes the list. At the same time, in terms of the number of generic taxa, Eristalinae is noticeably ahead of Syrphinae, 24 and 19 genera, respectively. The species rich Syrphinae genus *Platycheirus* Lepeletier et Serville, 1828 includes 30 species, which share 15.7 % of the fauna. The genus *Cheilosia* is the most species rich in the subfamily Eristalinae and includes 13 species. Analysis of species distribution showed that the fauna is formed mainly by widely spread species with multi regional, Holarctic or Trans-Eurasian ranges.

Резюме. В результате проведённого исследования на территории Магаданской области обнаружено 198 видов мух-журчалок, относящихся к 45 родам трёх подсемейств. Представителей подсемейства Microdontinae, как и во многих других северных фаунах, не обнаружено. Наибольшее число, 104 вида, отмечено в подсемействе Syrphinae, в подсемействе Eristalinae — 88 видов, в Pipizinae — 6 видов; количество родов в Eristalinae — 24, в Syrphinae — 19. Род *Platycheirus* Lepeletier et Serville, 1828 в Syrphinae представлен 30 видами, которые составляют 15.7 % от всей фауны журчалок, в подсемействе Eristalinae наиболее разнообразен род *Cheilosia*, включающий 13 видов. Анализ распространения показал, что основную часть фауны журчалок составляют широко распространённые виды с мультирегиональными, голарктическими и трансевразиатскими ареалами.

Introduction

Hoverflies or Syrphidae, due to their bright color, ubiquity and relatively large size, represent one of the most studied groups of Dipteron insects. In recent years studies of the Syrphidae of the tundra and forest-tundra zones of the Palaearctic have made it possible to get

a general idea of the distribution of representatives of this family in the extreme North of Asia [Barkalov, 2012, 2015a, b, 2020; Barkalov, Mutin, 2015, 2016]. The faunas of this family in mountainous regions and in the taiga territories of Siberia remain unexplored.

Information on the hoverflies of the taiga zone of the Magadanskaya Oblast is available in the scattered works of N.A. Violovich with descriptions of new species [Violovich, 1975, 1982, 1985], and in two works by L.V. Zimina dedicated to the Syrphidae fauna of the Magadanskaya Oblast and the description of rare findings of hoverflies, including those from the Magadanskaya Oblast [Zimina, 1972, 1981]. The last purposeful study of this region was carried out quite recently [Mutin, Tridrikh, 2016]. Unfortunately, a rather large collection kept in the Siberian Zoological Museum of the Institute of Systematics and Ecology of Animals of the Siberian Branch of RAS (SZMN, Novosibirsk) remained unexplored in this work. Below we have tried to fill this gap.

Material and methods

The purpose of this work is to give the most complete picture of the hoverfly fauna of the north-eastern Palaearctic within the Magadan region.

We have studied a lot of new material obtained by N.N. Tridrich during 2017–2020 and V.S. Sorokina in 2017. The work also used materials received in different years from the staff of the Institute of Biological Problems of the North FEB RAS (Magadan) — E.G. Matis, D.I. Berman and Yu.M. Marusik.

The list of species below gives information on the collection sites, which have not been published anywhere else. If a species has been indicated in any publication from Magadanskaya Oblast, literature sources are also given. The taxa in the list are sorted by subfamily, with the genus listed in alphabetical order. If there

are subgeneric taxa in a genus, they are also listed in alphabetical order. Species whose presence in the study area is in doubt are given in the list with a question mark (?).

Since the collections of recent years were carried out in a limited number of places, in order to reduce their repetition in the lists of studied materials for each species, we give a full description of the localities once, and in the text we give only the corresponding abbreviated names: **1** — Bolshoj Annachag mountain ridge, basin of Sibit-Tyellakh river; **2** — Chelomdzha River, environs of Kheta Kordon, 60°14' N, 147°28' E; **3** — confluens Kava and Chelomdzha rivers, environs of Tsentralnyi cordon, 60°14' N, 147°28' E; **4** — environs of Magadan, foot of Marchekan hill, 59°31' N, 150°48' E; **5** — environs of Magadan town, 59°36' N, 150°51' E, 131 m a.s.l.; **6** — Seimchan settlement, 62°56' N, 152°24' E, 209 m a.s.l.; **7** — 100 km NNE Seimchan settlement, 63°39' N, 153°16' E; **8** — 150 km NNE Seimchan settlement, 63°50' N, 153°31' E; **9** — environs of Evensk settlement, 61°54' N, 159°12' E, 1 m a.s.l.; **10** — mouth of Yana river, 2 km E Taulsk village, 59°43' N, 149°23' E, 2 m a.s.l.; **11** — environs Jack London lake, 62°08' N, 149°27' E, 149 m a.s.l.; **12** — Koni Peninsula, environs of cordon Mys Ploskij, valley of Khindzha river, 59°09' N, 151°38' E; **13** — Mouth of Kegali river, 64°45' N, 161°05' E, 482 m a.s.l.; **14** — 5 km W Arman village, 59°42' N, 150°04' E, 15 m a.s.l.

The most often meeting families of collectors are given in following abbreviations: D.I. Berman — B., L.F. Levina — L., Yu.M. Ma-rusik — M., N.N. Tridrikh — T., V.S. Sorokina — S.

Determination was made by Mutin, Barkalov, 1999, Violovitsh, 1983 and Bartsch et al., 2009a, b. In difficult cases specimens compared with specimens from collection of the Siberian Zoological Museum of the Institute of Animal Systematics and Ecology (SZMN, Novosibirsk).

The list of hover-fly species of Magadanskaya Oblast of Russia

Syrphinae

Baccha elongata (Fabricius, 1775)

Baccha elongata (Fabricius, 1775): Zimina, 1972: 38; Mutin, Barkalov, 1999: 361; Mutin, Tridrikh, 2016: 134.

Material. **5** — 1♂, 30.07–4.08.2020 (T); **12** — 1♂, 1♀, 5.07.2017, 7.07.2018 (T).

Chrysotoxum arcuatum Linnaeus, 1758

Chrysotoxum arcuatum Linnaeus, 1758: Violovitsh, 1982: 194; Mutin, Tridrikh, 2016: 134.

Material. **13** — 4♀♀, 11–22.08.1968 (L.).

Chrysotoxum fasciolatum (De Geer, 1776)

Chrysotoxum fasciolatum (De Geer, 1776): Zimina, 1972: 42; Violovitsh, 1982: 195; Mutin, Tridrikh, 2016: 134.

Material. **1** — 1♀, 16.07.1979 (Zhilgulskij), 1♂, 4.08.1979 (Budarin); **5** — 1♂, 29.07.1992 (B.); **7** — 1♂, 10.07.2019 (T); **12** — 1♀, 2–3.07.2017 (S); **1♀**, 326 km from Debin settlement,

valley of Kolyma river, 18.06.1974 (Korotyaev); **1♀**, environs of Khasyn settlement, 21.07.1972 (Matis).

Dasysyrphus friuliensis Goot, 1960

Dasysyrphus friuliensis Goot, 1960: Violovitsh, 1982: 191; 1983: 39; Mutin, Barkalov, 1999: 381; Mutin, Tridrikh, 2016: 134.

Material. **4** — 1♂, 2♀♀, 22.06.2019 (T); **9** — 1♂, 28.07.2020 (T.); **11** — 2♂♂, 1♀, 21.06.1974 (Matis); **12** — 1♂, 2♀♀, 30.06–6.07.2017 (S); **13** — 1♂, 1♀, 16.06.1968, 12.07.1968 (L.); **1♀**, environs of Debin settlement, 18.06.1974 (Korotyaev); **1♀**, 10 km N mouth of Detrin river, 16.07.1992 (B.).

Dasysyrphus kegali Violovitsh, 1975

Dasysyrphus kegali Violovitsh, 1975: Violovitsh, 1975: 79, 1982: 192; 1983: 39; Mutin, Tridrikh, 2016: 134.

Material. **9** — 1♀, 28.06–4.07.2020 (T); **1♀**, 92 km NE Magadan 60°20' N, 151°23' E, 10.07.2017 (S.).

Dasysyrphus pinastri (De Geer, 1776)

Dasysyrphus pinastri (De Geer, 1776): Mutin, Barkalov, 1999: 381; Mutin, Tridrikh, 2016: 134.

Dasysyrphus pauxillus (Williston, 1887)

Dasysyrphus pauxillus (Williston, 1887): Mutin, Barkalov, 1999: 381.

Material. **12** — 1♀, 2–3.07.2017 (S.).

Dasysyrphus tricinctus (Fallén, 1817)

Syrphus tricinctus (Fallén, 1817): Zimina, 1972: 41;

Dasysyrphus tricinctus (Fallén, 1817): Violovitsh, 1982: 192; Mutin, Barkalov, 1999: 379; Mutin, Tridrikh, 2016: 134.

Material. **5** — 1♂, 8.07.1986 (Popova), 1♀, 29.07.1992 (B.); **13** — 1♀, 20.07.1968 (L.).

Dasysyrphus venustus (Meigen, 1822)

Dasysyrphus arcuatus (Fallén, 1817): Zimina, 1972: 41; Violovitsh, 1982: 191;

Dasysyrphus venustus (Meigen, 1822): Mutin, Barkalov, 1999: 381; Mutin, Tridrikh, 2016: 134.

Material. **5** — 1♂, 28.06.1976 (?); **12** — 2♂♂, 3♀♀, 2–6.07.2017 (S.); **13** — 2♂♂, 4♀♀, 11.06–17.07.1968 (L.); **2♀♀**, upper river Kolyma, 10 km N mouth of Detrin river, 16.07.1992 (B.); **1♀**, upper river Kolyma, 35 km ENE Taloj settlement, 13.06.1974 (Matis); **2♀♀**, Stekolnyj settlement, 8.06.1971 (Glushkova); **1♀**, Madaun settlement, 15.06.1971 (?); **1♀**, environs of Debin settlement, 18.06.1974 (Korotyaev); **1♀**, upper stream of Kolyma river, opposite mouth of Elgenya river, 10.07.1992 (B.).

Dasysyrphus zinchenkoi Mutin et Barkalov, 1997

Dasysyrphus zinchenkoi Mutin et Barkalov, 1997: Mutin, Tridrikh, 2016: 134.

Didea alneti (Fallén, 1817)

Didea alneti (Fallén, 1817): Zimina, 1972: 40, 1981: 152; Violovitsh, 1982: 192; Mutin, Barkalov, 1999: 382; Mutin, Tridrikh, 2016: 134.

Material. **1** — 1♂, 07.1978 (Budarin); **6** — 1♀, 2.07.1966 (Chelyaev); **13** — 6♂♂, 19♀♀, 17.06–26.08.1968 (L.); **1♂**, 2♀♀, Lamutskoe settlement, 25.08.1965, 5.08.1968 (Bobrova); **4♂♂**, 3♀♀, upper river Kolyma, 10 km N mouth of Detrin river, 16.07.1992 (B.); **5♂♂**, 2♀♀, upper river Kolyma, opposite mouth of Eleniya river, 10.07.1992 (B.).

Didea fasciata Macquart, 1834

Didea fasciata Macquart, 1834: Mutin, Barkalov, 1999: 381; Mutin, Tridrikh, 2016: 134.

Material. 5 — 1♀, 29.07.1992 (B); 6 — 2♀♀, 20.07.1966 (Chelyaev); 1♀, upper river Kolyma, 10 km N mouth of Detrin river, 16.07.1992 (B).

Epistrophe annulitarsis (Stackelberg, 1918)

Epistrophe annulitarsis (Stackelberg, 1918): Mutin, Tridrikh, 2016: 134.

Epistrophe grossulariae (Meigen, 1822)

Epistrophe grossulariae (Meigen, 1822): Violovitsh, 1982: 189; Mutin, Barkalov, 1999: 382; Mutin, Tridrikh, 2016: 134.

Epistrophe nitidicollis (Meigen, 1822)

Syrphus nitidicollis Meigen, 1822: Zimina, 1972: 41; *Epistrophe nitidicollis* (Meigen, 1822): Mutin, Barkalov, 1999: 385; Mutin, Tridrikh, 2016: 134.

Epistrophe ochrostoma (Zetterstedt, 1849)

Material. 13 — 1♂, 1♀, 15–17.06.1968 (L.).

Episyphus balteatus (De Geer, 1776)

Episyphus balteatus (De Geer, 1776): Violovitsh, 1982: 193; Mutin, Tridrikh, 2016: 134.

Eriozona (Megasyrphus) erratica (Linnaeus, 1758)

Eriozona (Megasyrphus) erratica (Linnaeus, 1758): Mutin, Barkalov, 1999: 386; Mutin, Tridrikh, 2016: 134.

Material. 5 — 1♂, 29.07.1992 (B); 3♀♀, headwaters of Kolyma river, opposite mouth Elegnya river, 10.08.1992 (B); 1♀, 10 km N mouth Detrin river, 16.07.1992 (B).

Eriozona (Eriozona) syrphoides (Fallén, 1817)

Eriozona (Eriozona) syrphoides (Fallén, 1817): Violovitsh, 1982: 193; Mutin, Barkalov, 1999: 386; Mutin, Tridrikh, 2016: 134.

Material. 1♀, 17 km N Magadan, 2.08.1996 (Marusik).

Eupeodes bucculatus (Rondani, 1857)

Eupeodes bucculatus (Rondani, 1857): Mutin, Tridrikh, 2016: 134.

Material. 2♀♀, 7 — 10–13.07.2019 (T.).

Eupeodes corollae (Fabricius, 1794)

Metasyrphus corollae (Fabricius, 1794): Violovitsh, 1982: 190;

Eupeodes corollae (Fabricius, 1794): Mutin, Tridrikh, 2016: 134.

Material. 12 — 1♀, 2–3.07.2017 (S); 1♀, environs of Evensk settlement, 3–26.07.2020 (T.).

Eupeodes latifasciatus (Macquart, 1829)

Material. 9 — 1♀, 3–26.07.2020 (T); 14 — 1♀, 18.06.2020 (T.).

Eupeodes lundbecki (Soot-Rien, 1946)

Syrphus lundbecki Soot-Rien, 1946: Zimina, 1981: 153;

Eupeodes lundbecki (Soot-Rien, 1946): Mutin, Tridrikh, 2016: 134.

Eupeodes nitens (Zetterstedt, 1843)

Postosyphus nitens Zetterstedt, 1843: Violovitsh, 1982: 191;

Eupeodes nitens (Zetterstedt, 1843): Mutin, Barkalov, 1999: 389; Mutin, Tridrikh, 2016: 134.

Eupeodes punctifer (Frey in Kanervo, 1934)

Eupeodes punctifer (Frey in Kanervo, 1934): Mutin, Tridrikh, 2016: 134.

Leucozona (Ischyrosyrphus) glaucia
(Linnaeus, 1758)

Ischyrosyrphus glaucius Linnaeus, 1758: Zimina, 1981: 151; Violovitsh, 1982: 189;

Leucozona (Ischyrosyrphus) glaucia (Linnaeus, 1758): Mutin, Barkalov, 1999: 390; Mutin, Tridrikh, 2016: 134.

Material. 5 — 3♀♀, 29.07.1992 (B.).

Leucozona (Ischyrosyrphus) laternaria
(Müller, 1776)

Ischyrosyrphus laternarius Müller, 1776: Zimina, 1972: 40;

Leucozona (Ischyrosyrphus) laternaria (Müller, 1776): Mutin, Barkalov, 1999: 390; Mutin, Tridrikh, 2016: 134.

Leucozona (Leucozona) lucorum
(Linnaeus, 1758)

Leucozona (Leucozona) lucorum (Linnaeus, 1758): Zimina, 1972: 40; Violovitsh, 1982: 189; Mutin, Barkalov, 1999: 389; Mutin, Tridrikh, 2016: 134.

Melangyna (Melangyna) arctica
(Zetterstedt, 1838)

Melangyna (Melangyna) arctica (Zetterstedt, 1838): Mutin, Barkalov, 1999: 392; Mutin, Tridrikh, 2016: 134.

Material. 9 — 1♀, 2–26.07.2020 (T); 9 — 1♀, 26.06.2020 (T.).

Melangyna (Melangyna) barbifrons
(Fallén, 1817)

Melangyna (Melangyna) barbifrons (Fallén, 1817): Mutin, Barkalov, 1999: 392.

Material. 5 — 1♀, 26.08.2019 (T.).

Melangyna (Melangyna) basarukini
Mutin, 1998

Melangyna (Melangyna) basarukini Mutin, 1998: Mutin, Barkalov, 1999: 392; Mutin, Tridrikh, 2016: 134.

Material. 4 — 1♂, 9♀♀, 18, 22.06.2019, 3.7–8.08.2020 (T); 5 — 1♂, 12.07.2017 (S.).

Melangyna (Melangyna) coei
Nielsen, 1971

Melangyna (Melangyna) coei Nielsen, 1971: Mutin, Barkalov, 1999: 391; Mutin, Tridrikh, 2016: 134.

Melangyna (Melangyna) compositarum
(Verrall, 1873)

Melangyna (Melangyna) compositarum (Verrall, 1873): Violovitsh, 1982: 188; Mutin, Tridrikh, 2016: 134.

Material. 13 — 1♂, 6♀♀, 13, 22.07.1968 (L.).

Melangyna (Melangyna) lasiophthalma
(Zetterstedt, 1843)

Syrphus lasiophthalomus Zetterstedt, 1843: Zimina, 1972: 40;

Melangyna (Melangyna) lasiophthalma (Zetterstedt, 1843): Mutin, Tridrikh, 2016: 134.

Material. 10 — 1♂, 17.06.2020 (T.).

Material. 11 — 1♂, 1♀, 20–21.06.1974 (Matis); 12 — 1♀, 4.06.2017 (S.); 1♀, basin Sybyt-Tyellakh, 24.06.1979 (Andreev).

Platycheirus (Pachysphyria) ambiguus (Fallén, 1817)

Melanostoma ambiguum Fallén, 1817: Zimina, 1972: 39.
Material. 6 — 1♂, 20.07.1966 (Romashova).

Platycheirus (Pachysphyria) brunnifrons
Nielsen, 2004

Platycheirus coerulescens (Williston, 1887): Mutin, Barkalov, 1999: 365;

Platycheirus (Pachysphyria) brunnifrons Nielsen, 2004: Mutin, Tridrikh, 2016: 134.

Platycheirus (Platycheirus) albimanus
(Fabricius, 1781)

Platycheirus (Platycheirus) albimanus (Fabricius, 1781): Zimina, 1972: 39; Violovitsh, 1982: 187; Mutin, Barkalov, 1999: 369; Mutin, Tridrikh, 2016: 134.

Material. 13 — 1♂, 29.06.1968 (L); 14 — 3♀♀, 16–18.06.2020 (T.); 1♀, 32 km Seimchan, 17.07.1974 (Korotyaev).

Platycheirus (Platycheirus) amplus (Curran, 1927)

Platycheirus (Platycheirus) amplus (Curran, 1927): Mutin, Barkalov, 1999: 367; Mutin, Tridrikh, 2016: 134.

Material. 9 — 1♀, 6♂♂, 28.06–4.07.2020 (T.); 13 — 2♂♂, 10.07.1968 (L); 2♂♂, Markovo settlement, 7.07.1968 (Bobrova, L.).

Platycheirus (Platycheirus) angustatus
(Zetterstedt, 1843)

Platycheirus (Platycheirus) angustatus (Zetterstedt, 1843): Zimina, 1972: 39; Mutin, Barkalov, 1999: 370; Mutin, Tridrikh, 2016: 134.

Material. 6 — 2♀♀, 30.06.1966, 5.07.1966 (Romashova), 1♀, 26.07.1966 (Guzhina); 8 — 1♀, 5.07.2019 (T.); 9 — 3♂♂, 2♀♀, 26.06–7.07.2020 (T.); 12 — 3♂♂, 1♀, 2–7.07.2017 (S.); 13 — 1♂, 10.07.1968 (L); 1♀, 3 km N Garmanda vill., 14.07.2020 (T.).

Platycheirus (Platycheirus) beringiensis
Barkalov et Mutin, 2014

Material. 9 — 6♂♂, 5♀♀, 3–26.06.2020 (T.).

Platycheirus (Platycheirus) chilosia (Curran, 1922)

Platycheirus hirtipes Kanervo, 1938: Violovitsh, 1982: 187; Zimina, 1972: 39;

Platycheirus carinatus Curran, 1927: Mutin, Barkalov, 1999: 365; Mutin, Tridrikh, 2016: 134.

Material. 1♂, 2♀♀, Egvekinot settlement, 8.07.1989; 1♂, 118 km on road Egvekinot–lultin, 27.06.1989 (M.).

Platycheirus (Platycheirus) clypeatus (Meigen, 1822)

Platycheirus (Platycheirus) clypeatus (Meigen, 1822): Zimina, 1972: 39; Mutin, Tridrikh, 2016: 134.

Material. 9 — 2♂, 26.06–26.07.2020 (T.).

Platycheirus (Platycheirus) complicatus Becker, 1889

Material. 13 — 1♂, 2.07.1968 (L); 1♂, 30 km W Magadan, 28.06.2017 (S.).

Platycheirus (Platycheirus) discimanus (Loew, 1871)

Platycheirus (Platycheirus) discimanus (Loew, 1871): Zimina, 1972: 39; Mutin, Barkalov, 1999: 365; Mutin, Tridrikh, 2016: 134.

Material. 13 — 1♂, 8.06.1968 (L.).

Platycheirus (Platycheirus) goeldlini Nielsen, 2004

Material. 1♂, SE end of Bolshoj Anochan mountain ridge, Olen' river, 7.06.1979 (B.).

Platycheirus (Platycheirus) groenlandicus
Curran, 1927

Material. 13 — 2♂♂, 15, 16.06.1968 (L.).

Platycheirus (Platycheirus) naso (Walker, 1849)

Platycheirus (Platycheirus) naso (Walker, 1849): Mutin, Barkalov, 1999: 367; Mutin, Tridrikh, 2016: 134.

Material. 7 — 1♂, 1♀, 24.07.2019 (T.); 9 — 2♂♂, 2–26.07.2020 (T.); 13 — 15♂♂, 16.06–10.07.1968 (L.); 1♂, 120 km NNE Seimchan, 7.07.2019 (T.).

Platycheirus (Platycheirus) hyperboreus
(Staeger, 1845)

Platycheirus (Platycheirus) hyperboreus (Staeger, 1845): Zimina, 1972: 39; Violovitsh, 1982: 187; Mutin, Barkalov, 1999: 372; Mutin, Tridrikh, 2016: 134.

Platycheirus (Platycheirus) jakuticus
Violovitsh, 1978

Platycheirus (Platycheirus) jakuticus Violovitsh, 1978: Mutin, Barkalov, 1999: 365; Mutin, Tridrikh, 2016: 134.

Material. 13 — 1♂, 15.07.1968 (L.); 1♂, Ust'-Omchug settlement, 23.06.1963 (Zhelokhovcev).

Platycheirus (Platycheirus) latimanus
Wahlberg, 1844

Platycheirus (Platycheirus) latimanus Wahlberg, 1844: Violovitsh, 1982: 187; Peck, 1988: 71; Mutin, Barkalov, 1999: 365; Mutin, Tridrikh, 2016: 134.

Material. 12 — 1♂, 30.06.2017 (S.).

Platycheirus (Platycheirus) magadanensis
Mutin in Mutin et Barkalov, 1999

Platycheirus (Platycheirus) magadanensis Mutin, 1999: Mutin, Barkalov, 1999: 372; Mutin, Tridrikh, 2016: 134.

Material. 9 — 2♂♂, 2–26.07.2020 (T.).

Platycheirus (Platycheirus) manicatus
(Meigen, 1822)

Material. 10 — 2♂♂, 16–17.06.2020 (T.).

Platycheirus (Platycheirus) nielseni
Vockeroth, 1990

Platycheirus (Platycheirus) nielseni Vockeroth, 1990: Mutin, Barkalov, 1999: 367; Mutin, Tridrikh, 2016: 134.

Material. 6 — 1♂, 15.07.1966 (Polyakova); 14 — 1♂, 18.06.2020 (T.); 1♂, floodplain of Khinikandza river, 12.07.1971 (Glushkova).

Platycheirus (Platycheirus) parmatus
Rondani, 1857

Platycheirus (Platycheirus) parmatus Rondani, 1857: Mutin, Tridrikh, 2016: 134.

Material. 12 — 1♂, 2–3.07.2017 (S.).

Platycheirus (Platycheirus) peltatus
(Meigen, 1822)

Platycheirus (Platycheirus) peltatus (Meigen, 1822): Zimina, 1972: 39; Violovitsh, 1982: 188; Mutin, Tridrikh, 2016: 134.

Material. 6 — 4♀♀, 4—15.07.1966 (Guzhina); 13 — 15♀♀, 26.06—26.08.1968 (L.).

Platycheirus (Platycheirus) perpallidus Verrall, 1901

Platycheirus (Platycheirus) perpallidus Verrall, 1901: Mutin, Barkalov, 1999: 370; Mutin, Tridrikh, 2016: 134.

Platycheirus (Platycheirus) podagratus (Zetterstedt, 1838)

Platycheirus (Platycheirus) podagratus (Zetterstedt, 1838): Zimina, 1972: 39; Violovitsh, 1982: 188; Mutin, Barkalov, 1999: 370; Mutin, Tridrikh, 2016: 134.

Material. 9 — 1♂, 7.07.2020 (T); 13 — 2♂♂, 26.06.1968, 2.07.1968 (Levin).

Platycheirus (Platycheirus) scambus (Staeger, 1843)

Material. 10 — 1♂, 17.06.2020 (T.)

Platycheirus (Platycheirus) scutatus (Meigen, 1822)

Platycheirus (Platycheirus) scutatus (Meigen, 1822): Zimina, 1972: 39; Violovitsh, 1982: 188; 1983: 32; Mutin, Barkalov, 1999: 367.

Material. 9 — 1♂, 28.06.2020 (T); 13 — 1♂, 15.06.1968 (L.).

? *Platycheirus (Platycheirus) aff. scutatus* (Meigen, 1822)

Platycheirus (Platycheirus) aff. scutatus (Meigen, 1822): Mutin, Tridrikh, 2016: 134.

Platycheirus (Platycheirus) sigiktae
Mutin in Mutin et Barkalov, 1999

Material. 9 — 1♂, 29.07.2020 (T.).

Platycheirus (Platycheirus) setitarsis
Vockeroth, 1990

Platycheirus (Platycheirus) setitarsis Vockeroth, 1990: Mutin, Barkalov, 1999: 365; Mutin, Tridrikh, 2016: 134.

Material. 13 — 1♂, 15.06.1968 (L.).

Platycheirus (Platycheirus) sibiricus
Barkalov et Nielsen, 2007

Material. 13 — 2♂♂, 15—17.06.1968 (L.).

Platycheirus (Platycheirus) varipes Curran, 1923

Material. 1 — 1♂, 7.06.1979 (B.).

Platycheirus (Platycheirus) urakawensis
Matsumura, 1919

Material. 12 — 1♂, 6.07.2017 (S.)

Pyrophaena granditarsa (Forster, 1771)

Pyrophaena granditarsa (Forster, 1771): Violovitsh, 1982: 186; Mutin, Barkalov, 1999: 373; Mutin, Tridrikh, 2016: 134.

Material. 13 — 7♂♂, 7♀♀, 19.06—17.07.1968 (L.); 1♂, upper reaches of Kolyma river, 27.06.1974 (Korotyaev); 1♂, 76 km NE of Magadan, 31.07.1975 (Matis); 1♂, environs of Shirokij settlement, 4.07.1974 (Korotyaev); 3♂♂, 14♀, Seinchan, 7.06—15.07.1966 (Guzhina).

Pyrophaena platygastera (Loew, 1871)

Pyrophaena platygastera (Loew, 1871): Violovitsh, 1982: 187; Mutin, Barkalov, 1999: 373; Mutin, Tridrikh, 2016: 134.

Material. 6 — 2♀♀, 17—27.07.1966 (Guzhina, Romashova); 13 — 4♂♂, 1♀, 5.06—4.07.1968 (L.).

Pyrophaena rosarum Fabricius, 1787

Pyrophaena rosarum Fabricius, 1787: Mutin, Barkalov, 1999: 373; Mutin, Tridrikh, 2016: 134.

Material. 1 — 1♀, 27.06.1979 (Andreev); 1♀, 12 km N Klepka settlement, 16.08.1975 (Barkalov).

Scaeva lapponica (Zetterstedt, 1838)

Syrphus lapponicus Zetterstedt, 1838: Zimina, 1972: 40, 1981: 153;

Eupeodes (Lapposyrphus) lapponicus (Zetterstedt, 1838): Mutin, Barkalov, 1999: 386;

Lapposyrphus lapponicus (Zetterstedt, 1838): Mutin, Tridrikh, 2016: 134.

Material. 1 — 21♂♂, 21♀♀, 24.07—3.08.1979 (Budarin); 5 — 1♀, 29.08—2.09.2019 (T); 6 — 2♀♀, 23.07.1966 (Polyakova); 11 — 1♀, 21.06.1974 (Matis); 13 — 52♂♂, 106♀♀, 27.05—30.08.1968 (L.); 1♀, 120 km NNE Seimchan, 7.07.2019 (T.); 1♂, 2♀♀, Solnechny settlement, Magadanka river, 20.08.1978 (Vedernikov); 1♂, Madaun settlement, 11.08.1962 (Kononov); 2♂♂, 10 km N Detrin river mouth, 16.07.1992 (B.); 1♂, opposite Elegenya river mouth, 10.07.1992 (B.).

Scaeva pyrastri (Linnaeus, 1758)

Scaeva pyrastri (Linnaeus, 1758): Violovitsh, 1982: 190; Mutin, Tridrikh, 2016: 134.

Material. 1 — 1♀, 07.1978 (Budarin).

Sphaerophoria (Sphaerophoria) abbreviata
Zetterstedt, 1849

Sphaerophoria (Sphaerophoria) abbreviata Zetterstedt, 1849: Mutin, Barkalov, 1999: 404; Mutin, Tridrikh, 2016: 134.

Material. 13 — 2♂♂, 25.06.1968 (L.).

Sphaerophoria (Sphaerophoria) boreoalpina
Goeldlin, 1989

Material. 1♂, 4♀♀, 10 km NNE Seimchan, 12—19.07.2019 (T.).

Sphaerophoria (Sphaerophoria) makarkini
Mutin in Mutin et Barkalov, 1999

Sphaerophoria (Sphaerophoria) makarkini Mutin, 1999: Mutin, Barkalov, 1999: 404; Mutin, Tridrikh, 2016: 134.

Material. 9 — 2♂♂, 2—26.07.2020 (T.).

Spaerophoria (Sphaerophoria) pallidula
Mutin in Mutin et Barkalov, 1999

Spaerophoria (Sphaerophoria) pallidula Mutin, 1999: Mutin, Barkalov, 1999: 404; Mutin, Tridrikh, 2016: 134.

Material. 9 — 6♂♂, 6♀♀, 2—26.07.2020 (T.), 6♂♂, 20.07.2020 (T.), 1♂, 1.08.2020 (T.).

Sphaerophoria (Sphaerophoria) philanthus
(Meigen, 1822)

Sphaerophoria (Sphaerophoria) philanthus (Meigen, 1822): Violovitsh, 1983: 53; Mutin, Barkalov, 1999: 402; Mutin, Tridrikh, 2016: 135.

Material. 1 — 1♂, 19.08.1979 (Budarin); 7 — 1♂, 16.07.2019 (T.); 8 — 6♂♂, 2♀♀, 5.07.2019 (T.), 1♂, 5.07.2019 (T.); 9 — 11♂♂, 1♀, 20.07—4.08.2020 (T.), 18♂♂, 2♀♀, 2—26.07.2020 (T.), 2♂♂, 2♀♀, 26.06.2020 (T.), 3♂♂, 4♀♀, 27.06—27.07.2020 (T.); 11 — 2♂♂, 9.08.2020 (T.); 13 — 1♂, 26.06.1968 (L.); 1♂, 3 km N Garmanda village, S. Khulikagchan stream, 62°12' N, 159°06' E, 192 m as.l. 9.08.2020 (T.); 1♂, 3 km N Garmanda village, 14.07.2020 (T.); 1♂, upper stream of Kolyma river, 10 km N mouth of Detrin river, 16.07.1992 (B.).

Cheilosia (Eucartosyrphus) longula (Zetterstedt, 1838)

Cheilosia (Eucartosyrphus) longula (Zetterstedt, 1838): Zimina, 1972: 42; Mutin, Tridrikh, 2016: 133.

Material. 1 — 1♀, 3.08.1979 (Budarin); 2 — 2♀♀, 19, 23.08.2014 (T); 3 — 1♀, 30.07.2014 (T); 5 — 1♂, 12.07.2017 (S); 8♂♂, 23♀♀, 30.07—28.08.2020 (T); 1♂, 29.07.1992 (B.); 6 — 3♀♀, 2—10.08.1966 (Chelyaev); 7 — 14♀♀, 10.07—2.09.2019 (T.); 9 — 1♀, 2—26.07.2020 (T.); 11 — 17♀♀, 8—18.08.2020 (T.); 12 — 3♂♂, 2—3.07.2017 (S.); 13 — 7♀♀, 26.07—7.08.1968 (L., Polyakova); 1♂, 20 km from Magadan, valley of Sneshnaya river, 27.07.1997 (Mutin); 1♀, 50 km N Magadan, 2.08.2020 (T.); 1♂, 53 km N Magadan, 10.07.2017 (S.); 1♂, 1♀, 120 km NNE Seimchan, 7.07.2019 (T.); 3♂♂, 2♀♀, upper stream of Kolyma river, 10 km N mouth of Detrin river, 16.07.1992 (B.); 1♂, 3♀♀, upper stream of Kolyma river, opposite of mouth of Elenga river, 10.07.1992 (B.); 6♂♂, 19♀♀, upstream of Kolyma river, environs of Peak Aborigen, 9, 11.08.1986 (Dubatolov); 1♀, Ola river, 12.08.1975 (Barkalov); 1♀, Khinikandzha, 12.07.1971 (Budarin); 1♀, Nogaevskaya bay, Southern coast, 25.07.1997 (Mutin); 1♂, 2♀♀, environs Sokol village, 1.08.2020 (T.).

Cheilosia (Floccococheila) motodomariensis Matsumura, 1916

Cheilosia (Floccococheila) motodomariensis Matsumura, 1916: Mutin, Tridrikh, 2016: 133.

Material. 5 — 1♂, 5♀♀, 12.07.2017 (S.); 1♀, Nyuklya settlement, 1.08.1992 (B.).

Cheilosia (Montanocheila) gorodkovi Stackelberg, 1963

Cheilosia (Montanocheila) gorodkovi Stackelberg, 1963: Barkalov in Violovitsh, 1983: 80; Mutin, Barkalov, 1999: 426.

Cheilosia (Neocheilosia) convexifrons Stackelberg, 1963

Cheilosia (Neocheilosia) convexifrons Stackelberg, 1963: Mutin, Barkalov, 1999: 436.

Cheilosia (Pollinocheila) chukotana Barkalov et Mutin, 2014

Material. 5 — 1♂, 22.06.2019 (T.).

Cheilosia (Taeniochilosia) violovitshi Barkalov, 1979

Cheilosia (Taeniochilosia) violovitshi Barkalov, 1979: Mutin, Barkalov, 1999: 410; Mutin, Tridrikh, 2016: 133.

Material. 1 — 1♀, 1200 m a.s.l., 28.07.1978 (Budarin); 9 — 1♀, 28.06—4.07.2020 (T.).

Chrysosyrphus alaskensis (Shannon, 1922)

Chrysosyrphus alaskensis (Shannon, 1922): Mutin, Barkalov, 1999: 459; Mutin, Tridrikh, 2016: 133.

Material. 9 — 5♂♂, 7♀♀, 28.06—23.07.2020 (T.); 14 — 2♂♂, 2♀♀, 18.06.2020 (T.).

Chrysosyrphus nasuta (Zetterstedt, 1838)

Chrysosyrphus nasuta (Zetterstedt, 1838): Mutin, Tridrikh, 2016: 133.

Material. 9 — 24♂♂, 66♀♀, 17.06—26.07.2020 (T.); 12 — 1♀, 2—3.07.2017 (S.); 1♀, Chemdzha River, environs of Kheta cordon, 13.07.2014 (T.).

Chrysosyrphus niger (Zetterstedt, 1843)

Chrysosyrphus niger (Zetterstedt, 1843): Zimina, 1972: 42; Mutin, Barkalov, 1999: 459; Mutin, Tridrikh, 2016: 133.

Material. 9 — 1♂, 11♀♀, 28.06—4.07.2020 (T.); 11 — 1♀, 10—18.08.2020 (T.).

Eristalis (Eoseristalis) abusiva Collin, 1931

Eristalis (Eoseristalis) abusiva Collin, 1931: Zimina, 1972: 43, 1981: 162; Violovitsh, 1982: 206; Mutin, Barkalov, 1999: 455; Mutin, Tridrikh, 2016: 133.

Material. 5 — 3♂♂, 4♀♀, 10—29.08.2019 (T.); 6 — 4♂♂, 12♀♀, 17.06—27.07.1966 (Guzhina, Polyakova, Romashova, Chelyaev); 1♂, 1♀, environs of Magadan, floodplain of Magadanka river, 17.08.1971 (Matis); 1♂, 1♀, 10 km N Magadana, 31.07.1978 (Matis); 1♂, 17 km N Magadan, 1—2.08.1995 (M.); 2♀♀, SW end of Bolshoj Annychag mountain ridge, 2—27.07.1979 (Andreev).

Eristalis (Eoseristalis) alpina Panzer, 1798

Eristalis (Eoseristalis) alpina Panzer, 1798: Violovitsh, 1982: 206; Mutin, Barkalov, 1999.

Eristalis (Eoseristalis) anthophorina (Fallén, 1817)

Eristalis (Eoseristalis) anthophorina (Fallén, 1817): Zimina, 1972: 43; Violovitsh, 1982: 206; Mutin, Tridrikh, 2016: 133.

Material. 5 — 1♂, 1♀, 29.07.1992 (B.); 6 — 4♀♀, 7.07—20.08.1966 (Polyakova, Romashova).

Eristalis (Eoseristalis) arbustorum (Linnaeus, 1758)

Eristalis (Eoseristalis) arbustorum (Linnaeus, 1758): Violovitsh, 1982: 206; Mutin, Barkalov, 1999: 453; Mutin, Tridrikh, 2016: 133.

Material. 5 — 3♂♂, 5♀♀, 24.08—2.09.2019 (T.); 6 — 24♂♂, 30♀♀, 7—23.07.1966 (Polyakova, Romashova); 2♀♀, environs of Magadan, Nyuklya settlement, 29.07—1.08.1992 (B.); 5♂♂, 17 km N Magadan, 1—2.08.1996 (M.).

Eristalis (Eoseristalis) fratercula (Zetterstedt, 1838)

Eristalis vallei (Kanervo, 1934): Violovitsh, 1982: 207;

Eristalis (Eoseristalis) fratercula (Zetterstedt, 1838): Mutin, Barkalov, 1999: 455; Mutin, Tridrikh, 2016: 133.

Material. 1♂, 2♀♀, upper stream of Kolyma river, Elgen settlement, 3—4.06.1975 (Barkalov); 1♂, Ust'-Chaun, 1.08.1986 (Dubatolov); 1♂, Kulu river, environs of Kulu settlement, 16.06.1976 (Glushkova).

Eristalis (Eoseristalis) gomojunovae Violovitsh, 1977

Eristalis (Eoseristalis) gomojunovae Violovitsh, 1977: Peck, 1988: 187; Mutin, Barkalov, 1999: 455; Mutin, Tridrikh, 2016: 133.

Material. 9 — 1♂, 23.07.2020 (T.).

Eristalis (Eoseristalis) hirta Loew, 1866

Eristalis tundrarum Frey, 1932: Zimina, 1972: 43, 1981; Violovitsh, 1982: 207; Mutin, Barkalov, 1999: 455;

Eristalis (Eoseristalis) hirta Loew, 1866: Mutin, Tridrikh, 2016: 133.

Xylota (Xylota) suecica (Ringdahl, 1943): Mutin, Barkalov, 1999: 495.

Material. 1♀, 40 km N Vetrennyj settlement, 30.07.1976 (Manshina).

Xylota (Xylota) triangularis Zetterstedt, 1838

Xylota (Xylota) triangularis Zetterstedt, 1838: Zimina, 1972: 44; Violovitsh, 1982: 214; Mutin, Barkalov, 1999: 492; Mutin, Tridrikh, 2016: 133.

Material. 1 — 2♂♂, 1♀, 7, 8.08.1978 (B); 6 — 1♀, 26.07.1966 (Polyakova); 7 — 2♂♂, 4♀♀, 10–24.07.2019 (T); 13 — 4♂♂, 2♀♀, 28.06.1968, 14.08.1968, 2.09.1968 (L); 2♂♂, 120 km NNE Simchan, 7.07.2019 (T); 2♀♀, environs Madaun settlement, 4, 12.07.1962 (Ivliev, Kupyanskaya).

Discussion

As a result of the study, 198 species of hoverflies belonging to 45 genera of three subfamilies were found in the Magadanskaya Oblast. Representatives of the subfamily Microdontinae, as in many other northern faunas, were not found in the study area. The twelve species given in the works of N.A. Violovich are indicated in the list with a question mark, since we did not find them in the materials of the SZMN, which this author used when writing the above publications. We do not consider these species in our further analysis. On the other hand, we left two species that we did not find, *Eristalis tenax* (L.) and *Sericomyia tolli* (Frey), on the list, since they have previously been found in very similar northern faunas.

Despite a significant increase in the list of species compared to the previous one (144 species of Mutin & Tridrikh [2016]), the overall ratio of taxa in subfamilies and in genera remained approximately equal. Most species were recorded in the subfamily Syrphinae (104 species), followed by Eristalinae (88 species) with a difference of 14 taxa, and the subfamily Pipizinae with 6 species closes the list. At the same time, in terms of the number of generic taxa, Eristalinae is noticeably ahead of Syrphinae — 24 and 19 genera, respectively. Such a ratio of genera and species is characteristic of several northern faunas studied by us, and is apparently natural for the entire Asian North. The richest genus in terms of species in the Syrphinae was the genus *Platycerius*, which has 30 species accounting for 15.7% of the total fauna. In the subfamily Eristalinae, the genus *Cheilosia* was the dominant in terms of the number of species, with 13 species. It is interesting to find in the studied boreal fauna two representatives of the genus *Eumerus*, mainly southern in its distribution. The unity of the fauna of the Magadanskaya Oblast and Chukotka is evidenced by the discovery of *Ch. chukotana* and *Pl. beringiensis* described quite recently in the fauna of Chukotka [Barkalov, Mutin, 2014].

The analysis of the arealogical composition of the studied fauna has shown that it is based on widespread species — with multiregional (common in several biogeographic kingdoms), Holarctic (found in both subkingdoms of the Holarctic), and trans-Eurasian (found from Western Europe to the shores of the Pacific Ocean) components.

Twelve species have a multiregional distribution, with the majority occurring not only in the Palaearctic and Nearctic, but also in the Oriental region. There are 66 species with the Holarctic type of distribution. Such a large number of «holarcts» confirms the close and long relationship between the faunas of Eurasia and North America through the land «bridges» that existed until relatively recently on a geological scale. Most likely, with a more thorough study of the northeastern Palaearctic and northwestern Nearctic, the number of such species will increase even more. These may include four species recently described from Chukotka and the Magadanskaya Oblast, *Parasyrphus magadanensis* Mut., *Platycheirus beringiensis* Bark. et Mut., *Pl. magadanensis* Mut. and *Cheilosia chukotana* Bark. et Mut. At present, these four species are endemic to the northeastern Palaearctic.

An even larger group in the fauna of the studied region is represented by trans-Eurasian species, of which there are 81. The presence of these species plus trans-Asian (21) and Far Eastern (11) species keeps the fauna of the Magadanskaya Oblast with a composition typical of boreal faunas of the Palaearctic.

Acknowledgements

We wish to thank Francis Gilbert (University of Nottingham, UK) for checking the English. We also thank all Siberian entomologists who collected material in a harsh condition of the Magadanskaya Oblast.

The authors express their sincere gratitude to the staff of the Institute of Biological Problems of the North FEB RAS (Magadan) — E.G. Matis, D.I. Berman and Yu.M. Marusik.

The work was conducted by Russian Foundation for Basic Research, grant No. 20-04-00027. The study of A.V. Barkalov was partly supported by the Federal Fundamental Scientific Research Program for 2021–2025 (0247-2021-0004).
